

Module Five – Found and Stolen Property

Question 13. Paul Finder discovers a gold ring with no identifying markings on it. Considering the additional information in each answer selection below (which are independent of each other), choose the most correct answer selection.

- a.* If Paul noticed the ring in a shop open to the public on top of a table in the public area of the shop, Paul has better title compared to anyone in the world except the true owner of the ring.
- b.* If Paul took the ring to a jeweler for an appraisal and the jeweler refuses to give the ring back to Paul after Paul relates that he found it, Paul's title to the ring is superior to the jeweler even though Paul is not the true owner of the ring.
- c.* If Paul found the ring in the mud of his neighbor's land while hired to mow the lawn of his neighbor, Paul has better title compared to anyone in the world except the true owner of the ring.
- d.* Paul has better title to the ring if it is lost property compared to anyone in the world except the true owner of the ring.
- e.* The statements in selections *b* & *d* are all correct.
